Subject: TAS Case Analysis - '07-'09 Camry 2AZ U250E MIL ON P0500

Hi Mark,

Per our discussion after the department meeting today here is an analysis of the TAS cases we have seen for the subject issue (224 total).
This was one of the topics mentioned at Longo as a MIL ON issue that they have difficulty duplicating or diagnosing.

There are several tabs at the bottom of this excel sheet that I have added and made graphs from.

Please understand I'm just looking at the contact quantity and didn't look into any of the case content, only the DTC P0500.

If you have any questions please let me know.

Thank you,

Andy Curtin
